

Framery Business Continuity and Disaster Recovery Plan

This Business Continuity and Disaster Recovery Plan outlines the procedures and strategies to ensure the continuity of operations and rapid recovery from any disruptive event, including natural disasters, cyber attacks, power outages, and other potential threats. The plan aims to minimize the impact of such events and protect the business, employees, and customers.

Framery has implemented a Business Continuity and Disaster Recovery Plan that provides guidelines and procedures to ensure that the organization can continue its critical business functions and minimize the impact of any disruption.

Risk Assessment

Framery has conducted a comprehensive risk assessment to identify potential risks and threats that may impact its operations. The assessment evaluated the likelihood and potential impact of each threat. The results are discussed at management team and communicated to the Board annually.

Business Impact Analysis

Framery has conducted a business impact analysis to evaluate the criticality of business functions and processes. The analysis identified the most essential functions that must continue in the event of a disruption.

Crisis Management

Framery has established a crisis management team and procedures to respond quickly and effectively to an incident. The team has the authority to make critical decisions and implement necessary actions to minimize the impact of the disruption.

Backup and Recovery

Framery has developed backup and recovery procedures for critical data, applications, and infrastructure. The procedures are regularly

tested to ensure they are effective and up-to-date.

Communication Plan

Framery has established a communication plan to ensure that all stakeholders are informed and kept up-to-date during a disruption. The plan provides guidance on how to communicate with employees, customers, vendors, and other relevant parties.

Training and Testing

Framery provides training to relevant employees on the business continuity and disaster recovery plan. Regular testing is conducted to ensure the plan is effective and up-to-date.

Maintenance and Updating

Framery regularly reviews and updates the business continuity and disaster recovery plan to ensure that it remains relevant and effective in the face of changing circumstances.
