

Framery Connect™

An all-round platform designed for impactful workplace management.

framery

Framery Connect is an all-round platform for workplace management. Use privacy-safe people-counting data to see exactly how and when people use your office. Identify underutilized and improperly used spaces to make precise layout adjustments, effectively cutting costs and maximizing real estate ROI.

Framery Connect / Product highlights

UNIFIED INSIGHTS AND ANALYTICS

Monitor occupancy data from both Framery smart pods and other workspaces with the Framery Room Sensor – all in one view.

IMPROVE SPACE USAGE

See how spaces are being utilized and make data-driven decisions to optimize office layouts or relocate pods.

SPACE EFFICIENCY METRICS

Gain reliable metrics by sensing and counting occupants within the space to verify if they are being utilized as intended.

TOTAL PRIVACY

Framery Connect utilizes fully anonymous occupancy data that is gathered through using millimeter wave technology (no camera & no microphone).

UNLIMITED USERS

Framery Connect doesn't restrict user numbers or require individual licenses. Invite your entire team to collaborate on office data at no additional cost.

ALL-IN-ONE MANAGEMENT

Framery Connect is a single platform for managing all Framery smart office solutions and smart pods.

Framery Connect / Product details

ACTIONABLE OFFICE DATA WITH FRAMERY CONNECT™

Access intuitive visual data via Framery Connect, our workplace management platform, and build a workplace that really works.

RIGHT FIT

Verify space design by confirming that occupancy aligns with intended room capacity plan.

USAGE TRENDS

Track utilization patterns and trends across all locations for a strategic overview.

DATA-DRIVEN DECISIONS

Identify and resolve availability shortages, capacity mismatches, and utilization issues using actual data.

GET A FULL VIEW OF USAGE DATA WITH FRAMERY CONNECT

FRAMERY SMART PODS

The anonymous occupancy data gathering happens automatically through a 4G connection and built-in sensors utilizing millimeter-wave technology.

See if pods are in the right locations and if their usage matches their intended capacity. If utilization is uneven, you can easily relocate underused pods to high-traffic areas or identify where more pods are needed to meet demand.

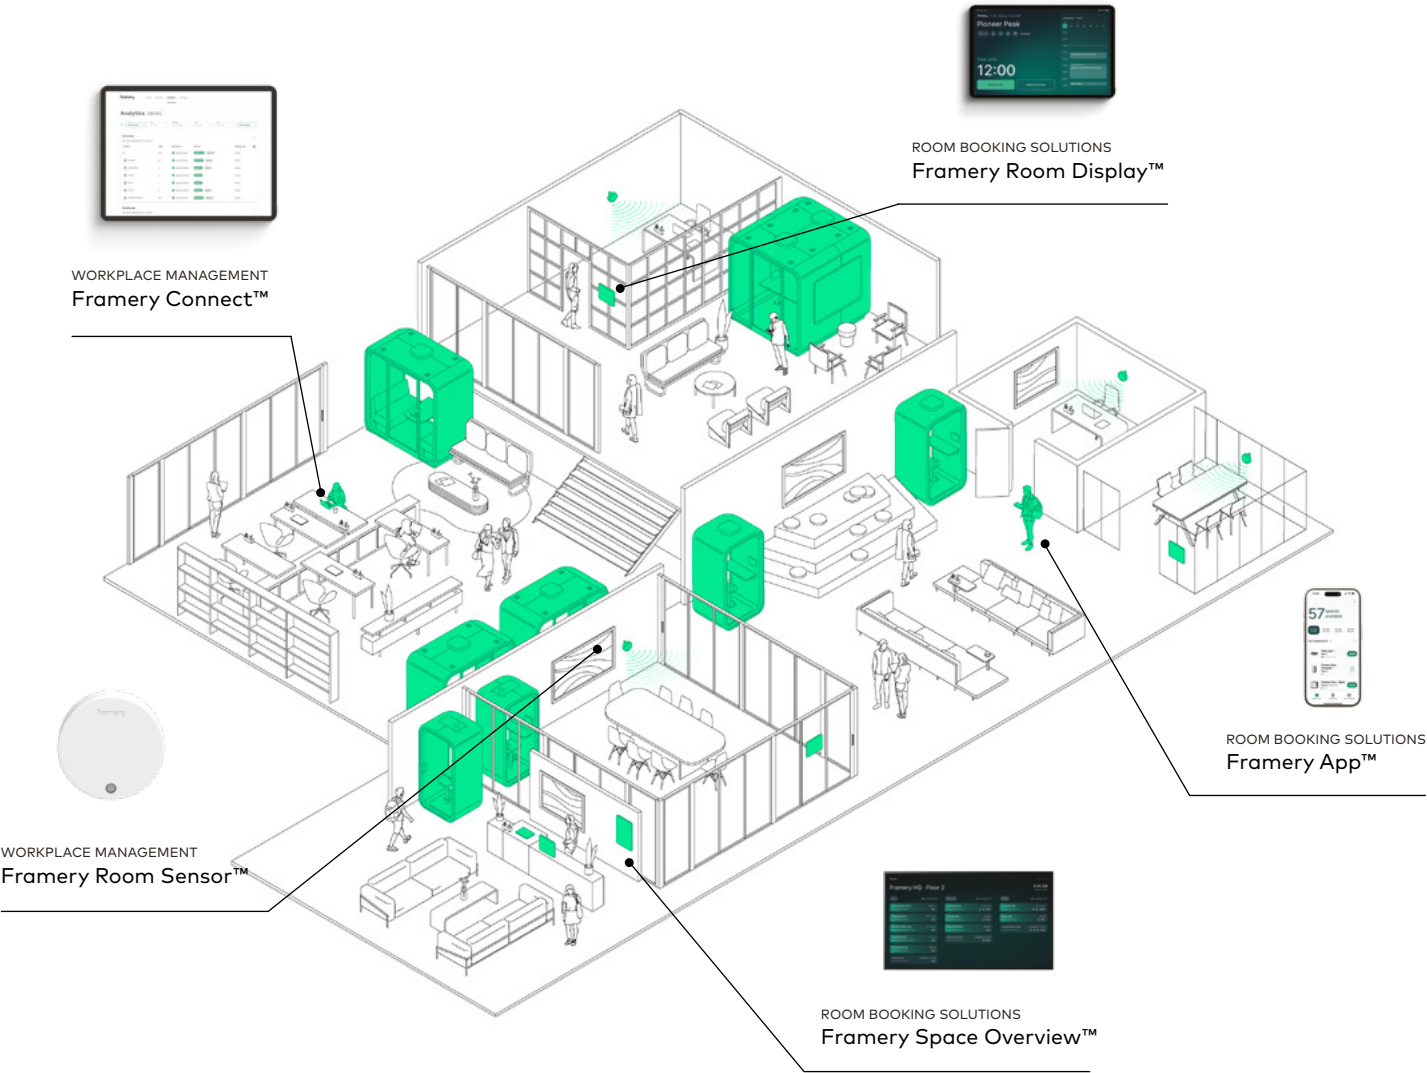

FRAMERY ROOM SENSOR

The sensor utilizes the same data-gathering technology as the smart pods – keeping all data anonymous and secure. Add the sensor to any space and get the insights you need to optimize your office.

See if your meeting rooms are used by the number of people it was designed for. If you identify a capacity mismatch, you can use these insights to adjust your office layout, or acquire the right type of spaces to better meet employee needs.

Framery smart office. For frictionless spaces. For smooth workdays.
