Introducing Gradus.
By Framery.

A canvas for your vision.

Gradus is a line of smart, soundproof workspaces assembled in the USA. Defined by its minimalist quiet design, the line serves as a versatile canvas that can harmonize with any architectural vision or stand out through premium custom finishes. Gradus provides high-functioning environments where people can plug in and perform at their best.

We created Gradus with a singular principle: quiet design. We believe a pod should harmonize with your vision, not compete with it. Its minimalist silhouette and clean, straight lines allow it to blend seamlessly into any architectural landscape.

But quiet doesn't mean limited. We've designed Gradus to be a canvas for your creativity. With our interchangeable wall panels, ranging from rich wood veneers to premium custom fabrics, you have total aesthetic flexibility. It is a pod that truly reads the

room, allowing you to choose whether it disappears into the background or stands out as a centerpiece. Whether you are designing for a high-energy collaborative hub or a serene deep-focus zone, Gradus evolves with your workplace.

ENGINEERED FOR THE RHYTHM OF WORK.

We've engineered every inch of Gradus to maximize interior volume while maintaining a minimal footprint. This is more than a pod; it's an environment designed for effortless flow.

Inside, the experience is frictionless. Step in, and the pod senses your presence. It automatically adjusts the silent, adaptive ventilation and optimizes the 4000K lighting for your task, whether it's a standard focus session or a high-definition hybrid meeting. Built on the three pillars of high-performance pods, Class A soundproofing, powerful ventilation, and versatile lighting, Gradus ensures you can plug in and perform at your best.

"We started with a simple question:
How can a pod harmonize with its
environment, instead of interrupting it?"

The answer was Gradus. A design that
doesn't demand the center stage, unless
wanted.

It's quiet. It's intentional.
It's everything a pod should be
—and nothing more."

Joonas Vartola

Chief Design Officer
Framery

"It's quiet. It's
intentional. It's
everything a pod
should be—and
nothing more."

THE TECH: SMART & EVOLVING.

Gradus is powered by the same industry-leading technology found in all Framery smart pods. It doesn't just sit in the room; it senses it. Through anonymized occupancy data, Gradus helps you 'rightsize' your office as it evolves. With automatic over-the-air updates, your workspace doesn't just stay current—it gets smarter every day.

BUILT WHERE YOU BUILD.

Our Michigan-based assembly line ensures more than just manufacturing quality; it ensures reliability. We provide fast lead times and a rapid response to North American project schedules. Every pod is fully compliant with the strictest North American safety and building standards from day one.

Focus. Work. Huddle.

Gradus Focus™

Gradus Focus is the smart and soundproof pod for one person, offering a spacious, fully private environment designed for the rhythm of modern work. Whether it's a high-stakes hybrid call or a deep-work sprint, this is where distractions disappear and your best work begins.

Gradus Work™

The smart and soundproof workstation for deep focus and hybrid work. Gradus Work is the best-equipped workstation in the professional landscape, providing a spacious, permanent-feeling environment designed for uninterrupted work.

Gradus Huddle™

The smart and soundproof meeting pod for 1-4 people. Optimally sized for spontaneous collaboration and confidential hybrid meetings, it provides a high-quality environment where teams can sync instantly without disturbing the surrounding workspace.

Everything a pod should be,
and nothing more.
